ABHINAY KRISHNA KANNAM

Hyderabad, India | abhinaykrishna@gmail.com | +91 6303949424 | LinkedIn | TryHackMe | GitHub | Portfolio

PROFESSIONAL SUMMARY

eJPT-certified cybersecurity graduate specializing in Vulnerability Assessment and Penetration Testing (VAPT), with hands-on experience in web application and network security testing through practical labs, CTF challenges, and security projects. Skilled in Linux and Windows security, Active Directory fundamentals, reconnaissance, enumeration, and privilege escalation. Proficient in Burp Suite, Nmap, Metasploit, BloodHound, Nuclei, Wireshark, Python, and Bash scripting. Experienced in vulnerability assessment, security documentation, report writing, and remediation recommendations, with a strong focus on identifying and mitigating security risks.

TECHNICAL SKILLS

VAPT & Security Tools: Burp Suite, Nmap, Metasploit, Nuclei, Wireshark

Networking: TCP/IP, OSI Model, DNS, HTTP/HTTPS, TCP/UDP, Ports & Services, Subnetting, Routing, Network Reconnaissance.

Web Application Security: SQL Injection, XSS, IDOR, SSRF, Authentication & Authorization Vulnerabilities, OWASP Top 10.

Active Directory Basics: AD Enumeration, BloodHound, Kerberos Basics, Kerberoasting, AS-REP Roasting.

Operating Systems: Kali Linux, Linux (Ubuntu/Debian), Windows .

Scripting : Python, Bash.

CERTIFICATIONS

- eLearnSecurity Junior Penetration Tester (eJPT) — INE

PROJECTS

WebSec Scanner — Web Application Security Scanner | abhinay-0528/WebSecScanner

- Developed a lightweight, modular security assessment tool using Python and Flask that automates web application crawling and vulnerability detection, including XSS, security misconfigurations, SSL/TLS issues, and sensitive file exposure.
- Key Features: Interactive dashboard with PDF/HTML report generation, directory discovery, form security analysis, and non-destructive vulnerability assessment for secure web application testing.

AutoPentest Framework — Automated Reconnaissance & Vulnerability Assessment Platform | abhinay-0528/AutoPentest

- Developed a Python-based automated reconnaissance and vulnerability assessment platform for attack surface mapping and security posture analysis.
- Implemented asset discovery, DNS/WHOIS enumeration, SSL/TLS analysis, port scanning, service detection, banner grabbing, and web technology fingerprinting.
- Built a centralized operator dashboard with vulnerability reporting, exposure detection, and professional PDF/HTML report generation for streamlined security assessments.

EDUCATION

CMR Institute of Technology, Hyderabad — Graduated June 2026
B.Tech in Computer Science and Engineering (Cybersecurity) | CGPA: 7.58 / 10

ACHIEVEMENTS & PORTFOLIO

- **eJPT Certification**: Achieved the eJPT certification from INE, validating practical penetration testing skills in reconnaissance, enumeration, vulnerability assessment, and network security.
-
